

A QUANTUM LEAP TO COLLABORATIVE ADAPTIVE E-SERVICING

ABOUT US

Combining shipping <u>expertise</u> with <u>information technology</u>, Danaos leads innovation in this sector, offering:

- World-class Research & Development
- The Danaos Platform the professional social network for the shipping industry
- A Rules Compliance system to improve compliance with statutory requirements
- Native solutions for mobile users

Danaos offers the most complete and integrated **web-enabled maritime software** system that automates all the daily functions of a shipping company.

Danaos is the market leader in maritime Information Technology, serving over **500 shipping companies** world-wide since its establishment in **1986**.

<u>Danaos Management Consultants S.A.</u> is proud to introduce <u>DANAOS1.com</u>, the first complete <u>e-servicing Platform for the Shipping Industry</u>.

Based on the European Maritime Strategic Framework (EMSF), DanaosONE™ (D1™) is a professional B2B versatile e-servicing Platform that seamlessly integrates with your internal operational, safety systems & compliance policies, securely.

- Danaos platform is a safe, secure, private, point to point network between well identified named members (shipping stakeholders).
- Every member maintains his individuality being in full control on which information will disclose to or collect from other stakeholders.
- Information exchanged between various stakeholders is structured and can be directly used to update corporate databases or trigger work processes.
- Information exchanged between stakeholders is secure since the platform does not maintain any commercial information. White IP and SSL/TLS protocols are used.
- Platform fully simulating today's business reality is offering business process integration end to end.

Any Device Ecosystem

www.danaos1.com

- 1. middleware
- 2. adaptive
- 3. multitenant
- 4. scalable
- 5. secure
- 6. expandable

Main Features

- ✓ Exposing your company's profile, products and/or services and establish confidential and authentic electronic relationships with companies of any type, sector and geographic location.
- ✓ Relating to a niche-Vertical (per Industry/Channel) international operations exchange system; as a trader, wholesaler, and manufacturer whereas associating as a Buyer, Agent and/or Supplier. Leverage peerto-peer communications without cost per transaction.
- ✓ Enhancing collaboration and communication, and be there without going there, among intranet and extranet users leveraging bilateral communications, peer-to-peer and 4-corner model connections.
- ✓ Executing eRFx tasks following **standardized** purchasing and selling procedures that **consolidate diligence** of Suppliers. Sharing your technical documentation to facilitate electronic proposals submission among creditable suppliers directly from your eRFx environment.

Main Features

- ✓ Piping the electronic documents generated by your ERP and back-office applications' ecosystem, in the format and channel of international business processes expected by the receiver without retaining or tracing corporate information what- so ever.
- ✓ Avoiding building and maintaining programming interfaces with individual buyer/supplier systems and storing data on cloud by letting our electronic transaction process (methodos™) execute the process transparently. Ensure security, confidentiality, integrity and authenticity of origin.
- ✓ Setting up your online event microsite and invite your partners and associates to share and participate the experience. Place and advertise your webcasts, videos, brochures on your virtual stand and make them available for anyone to download and share.

Platform Services

Joining D1™ will give you international exposure and endless possibilities to connect with other trusted members. D1™ provides a set of bundled services that facilitate Shipping Industry's essential everyday activities whilst allowing exposure of your products and services, creating new business opportunities

Offered Services

D1 can "bridge" any functionality provided by your in-house back office systems within a network of trusted stakeholders of your selection (extranet). Join D1™ and start exchanging information accurately and securely with your suppliers, partners, agents, brokers and affiliates avoiding the cumbersome of traditional information exchange.

Internal Services

Launch on-demand and expose to your internal users (intranet) certain inhouse system functionalities as services. This set of services can facilitate two-ways secure remote access to corporate information and assure compliance with regulatory and statutory operational and safety processes.
